Join us, work in a motivational and energetic environment,
take your skills to the next level!

Hello
@
BGO Software

Who we are

BGO Software is a technology company with 100 team members in
three cities across Bulgaria

BGO Software has been a recognised leader in the IT sector in Bulgaria and the world since its establishment in 2008. With headquarters in Sofia, Bulgaria, the company has completed advanced software projects for leading organisations within major industries, including IT, Logistics, Healthcare, Pharmaceutical, Clinical Research, Construction Engineering, and others. Currently, BGO Software is Microsoft Gold Partner, Progress Premier Partner, Business Partner of the second **largest pharmaceutical company** in the world and Official Government Supplier for the **Health Research Authority of the Department of Health in the UK.**

What makes us unique, however, is our belief that successful business equals **Social Responsibility**. To make a difference and be a driver of change in our society we have established one of the few completely free academic institutions - the Web Academy. In just two years we have trained over **2,500** people thus enabling them to join the IT industry. Our charity foundation **"For Bulgaria with love"** is changing the lives of underprivileged children and adults across Bulgaria. We have the pleasure of being the main sponsor of the Bulgarian Amateur Basketball League and the Youth Football Club in Zlatograd.

You can learn more about how we change Bulgaria every day at:

Job Description

We are looking for an iOS developer responsible for the development and maintenance of applications aimed at a range of iOS devices including mobile phones and tablet computers. Your primary focus will be development of iOS applications and their integration with back-end services. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and the creation of quality products is essential.

Main responsibilities

✓ Translate designs and wireframes into high quality code

✓ Design, build, and maintain high performance, reusable, and reliable Java code

✓ Ensure the best possible performance, quality, and responsiveness of the application

✓ Identify and correct bottlenecks and fix bugs

✓ Help maintain code quality, organization, and automatization

✓ Be part of the team decisions related to the architecture and technical implementation

What to expect from us

✓ Workflow helping you write effective and "clever" code and to develop yourself all the time

✓ Internal trainings and tons of knowledge

✓ Implement and tweak awesome features

✓ Additional health insurance

✓ Opportunity to turn your creative ideas and approach into real implementation

✓ Excellent working environment

✓ Full-time employment and labor contract

✓ Flexible working time

What are our expectations

✓ Proficient with Objective-C or Swift {{depending on project requirements}}, and Cocoa Touch

✓ Experience with iOS frameworks such as Core Data, Core Animation, etc.

✓ Experience with offline storage, threading, and performance tuning

✓ Familiarity with RESTful APIs to connect iOS applications to back-end services

✓ Knowledge of other web technologies and UI/UX standards

✓ Understanding of Apple's design principles and interface guidelines

✓ Knowledge of low-level C-based libraries is preferred

✓ Open minded and communicative, pro-active and curious

✓ Experience with performance and memory tuning with tools {{such as Instruments and Shark, depending on project needs}}

✓ Familiarity with cloud message APIs and push notifications

✓ Ability to design applications around natural user interfaces, such as "touch"

✓ Familiarity with the use of additional sensors, such as gyroscopes and accelerometers

✓ Ability to understand business requirements and translate them into technical requirements

✓ A knack for benchmarking and optimization

✓ Strong troubleshooting and analytical skills

What is an advantage

✓ Proficient understanding of code versioning tools, such as Git, Mercurial or SVN

✓ Familiarity with continuous integration

✓ Good knowledge in the test-driven development

Why working together will be great

Our office is super nice with an amazing view

Every member of our 100 people team is hand-picked and awesome

Flat and transparent company structure with well-defined responsibilities

Flexible working time

Premium health insurance package, with options for family members

No limits on your financial success - salary + commission-based package
